- 供給端限制：聽眾只能被動接受創作者生產的內容
- 內容不匹配：主題太廣、難度太淺，或缺乏你感興趣的特定跨領域結合
- 時間成本：為了獲取特定知識，必須聽完幾十分鐘的閒聊

Solution: 個人客製化Podcast系統

打破傳統供給框架：

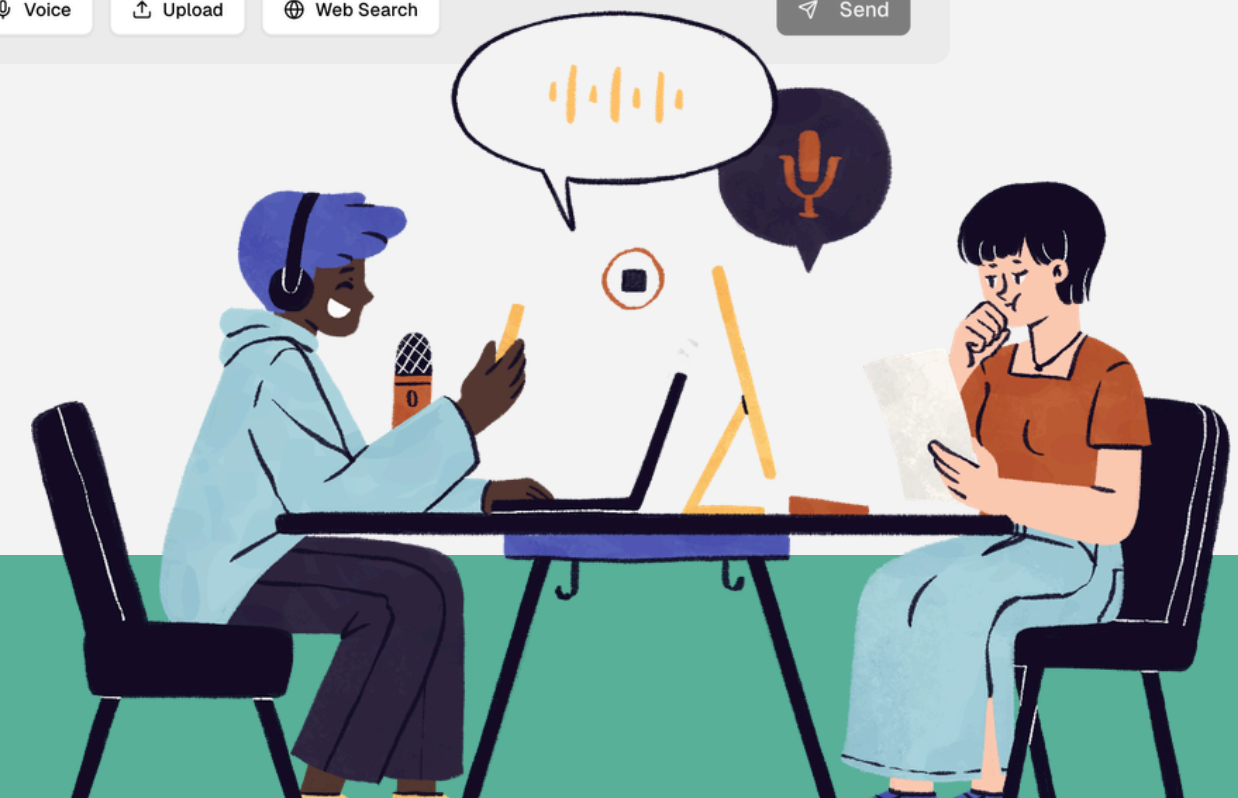

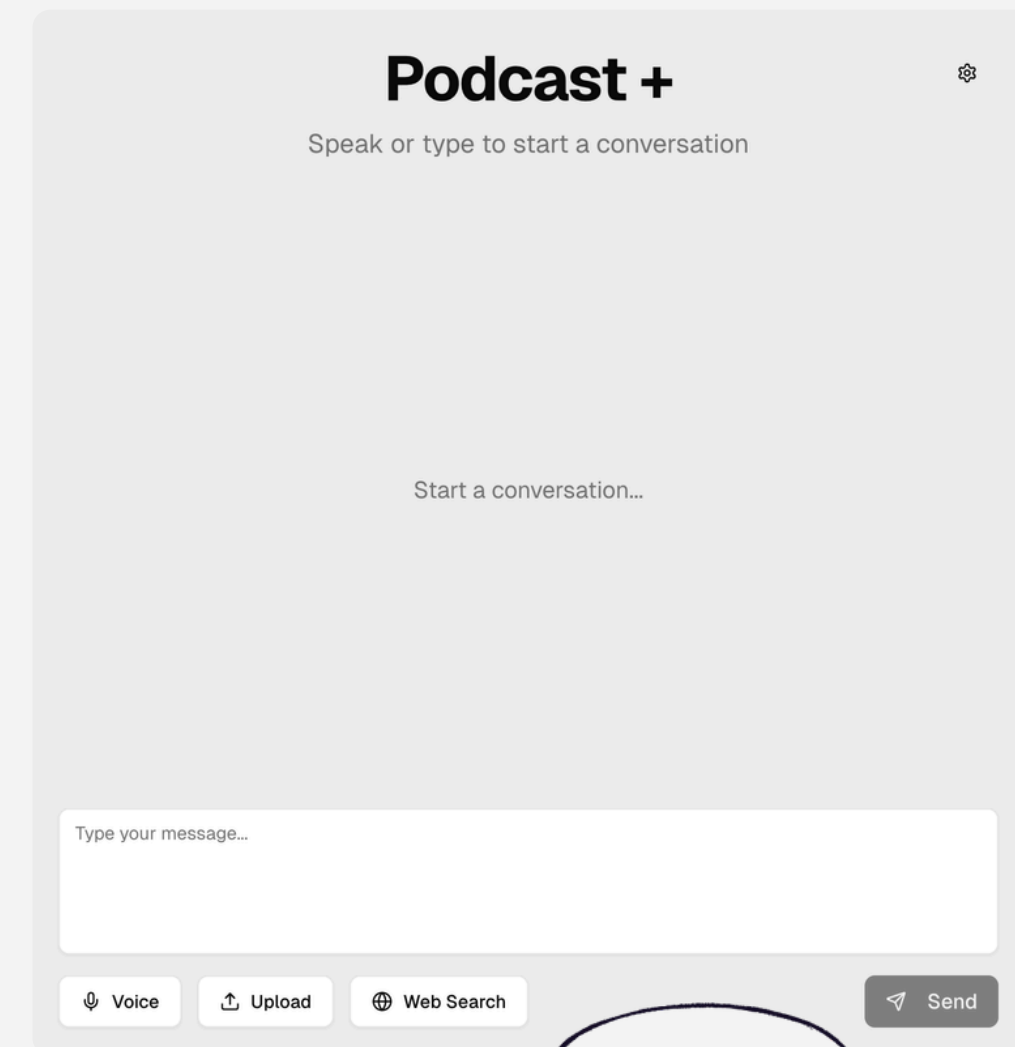

不再受限於市場現有的頻道，
解決冷門主題或跨領域需求找不到內容的困境

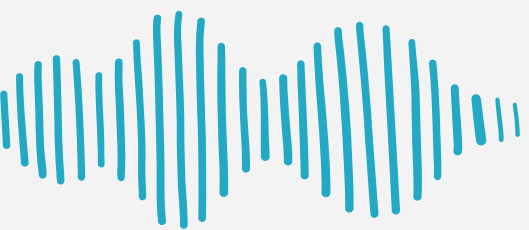

從找內容進化為造內容：

以使用者的好奇心為核心，
即時合成最符合當下需求的聽覺知識

打造個人專屬的知識音頻：

建立一個完全屬於個人、
隨時隨地生成的客製化 Podcast 系統

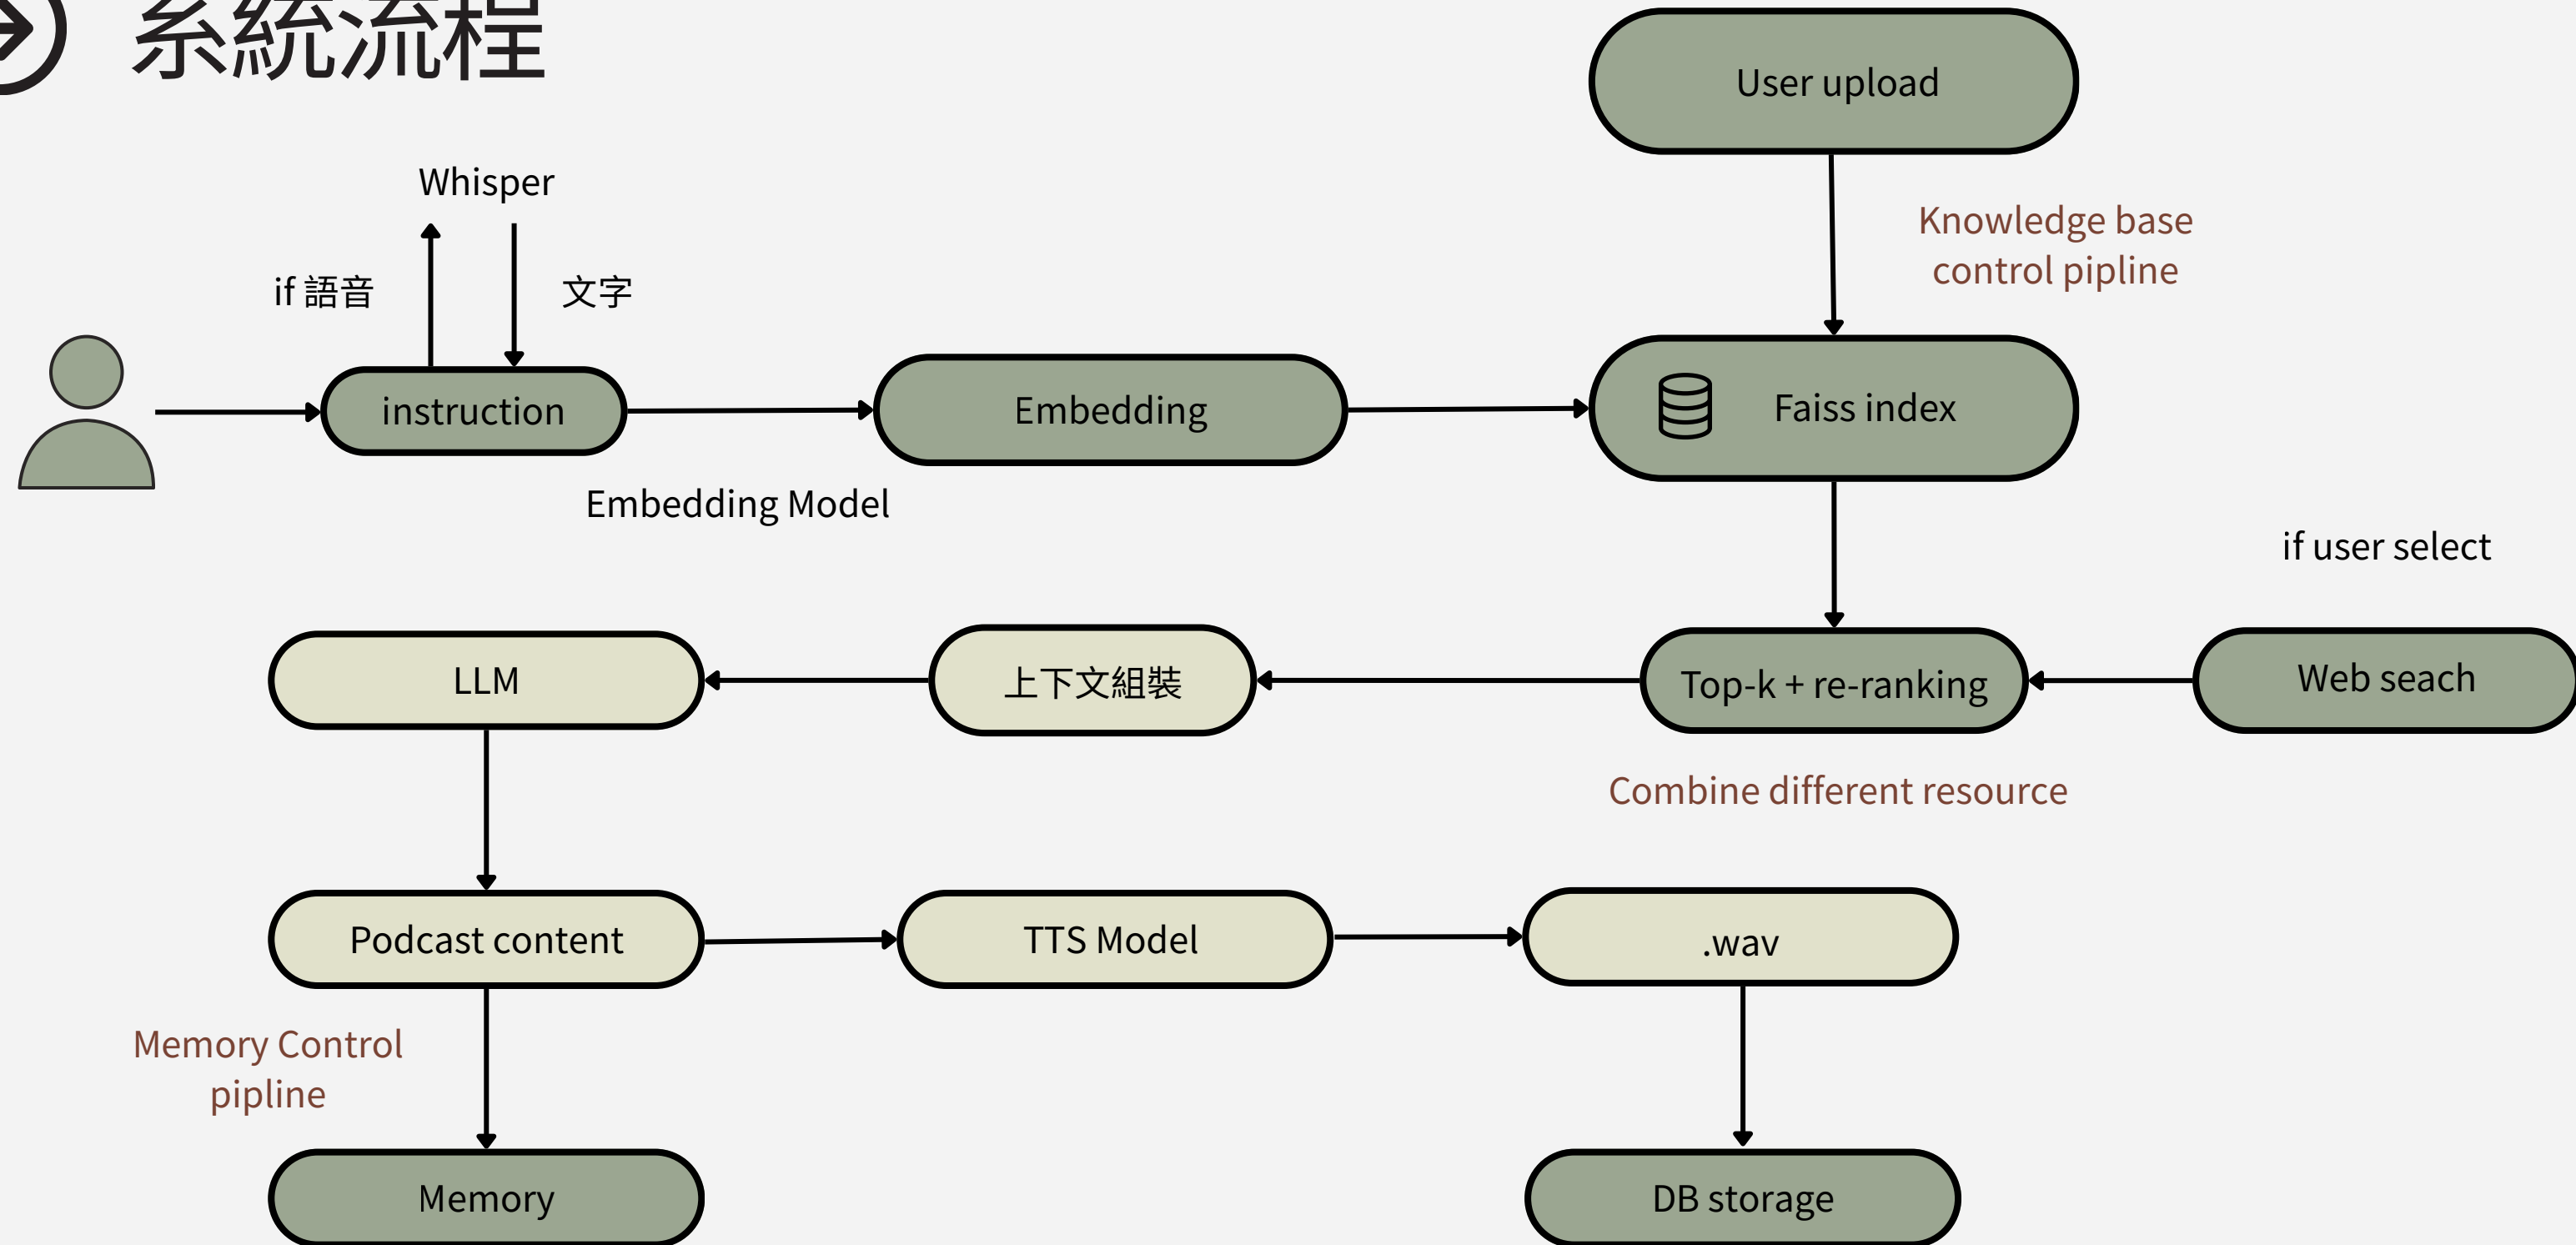

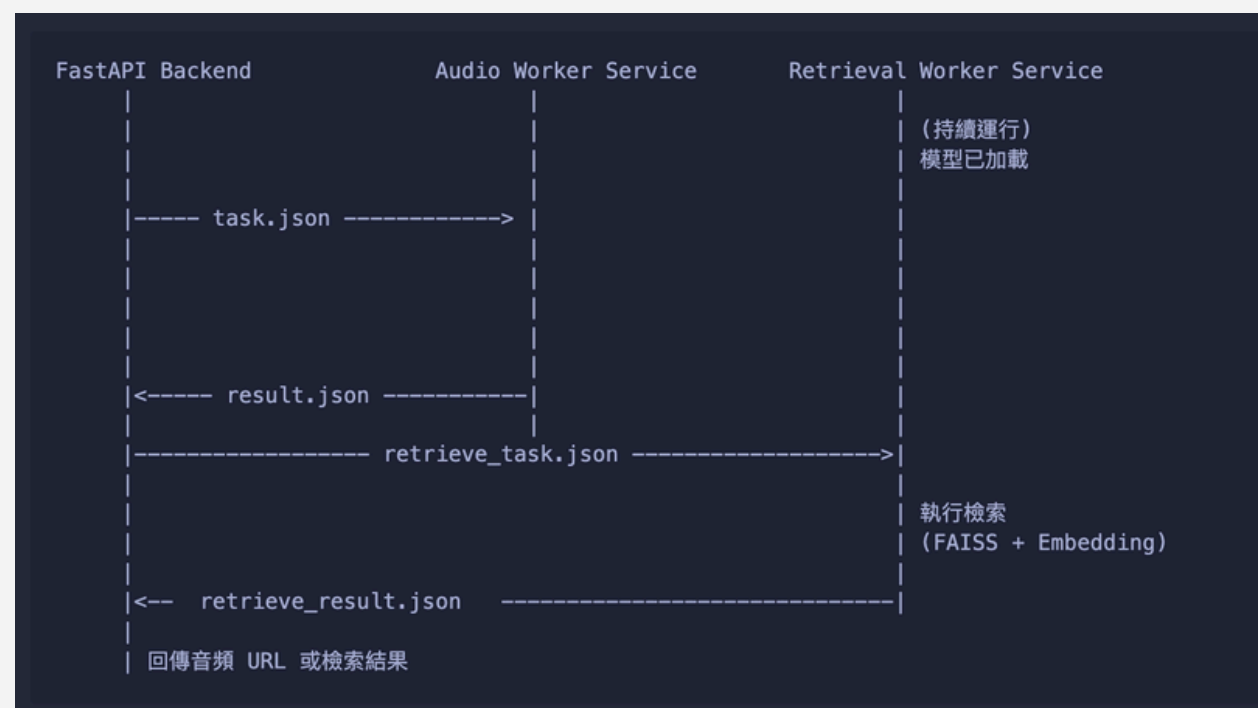

系統及開發架構

➔ 系統流程

➡ worker service 設計

針對 retrieve 和 音檔產出，設計了一套 worker 系統，運用 queue 實作，避免系統 crash

```
def generate_audio(dialogue: str, audio_id: str, output_dir: str):
    """Generate audio from dialogue text"""
    try:
        print(f"[Worker] Starting audio generation for: {audio_id}", file=sys.stderr)

        # Initialize TTS pipeline
        print("[Worker] Loading Kokoro TTS pipeline...", file=sys.stderr)
        pipeline = KPipeline(
            lang_code='a',
            device='cpu',
            repo_id='hexgrad/Kokoro-82M'
        )
        print("[Worker] TTS pipeline loaded", file=sys.stderr)
```

audio_worker

```
def retrieve_context(query: str, top_n: int = 3):
    """Retrieve context from FAISS index"""
    try:
        print(f"[Worker] Retrieving context for: {query[:50]}...", file=sys.stderr)

        from rag.retrieval import retrieve

        # Retrieve relevant chunks
        results = retrieve(query, top_n=top_n)
```

retrieve_worker

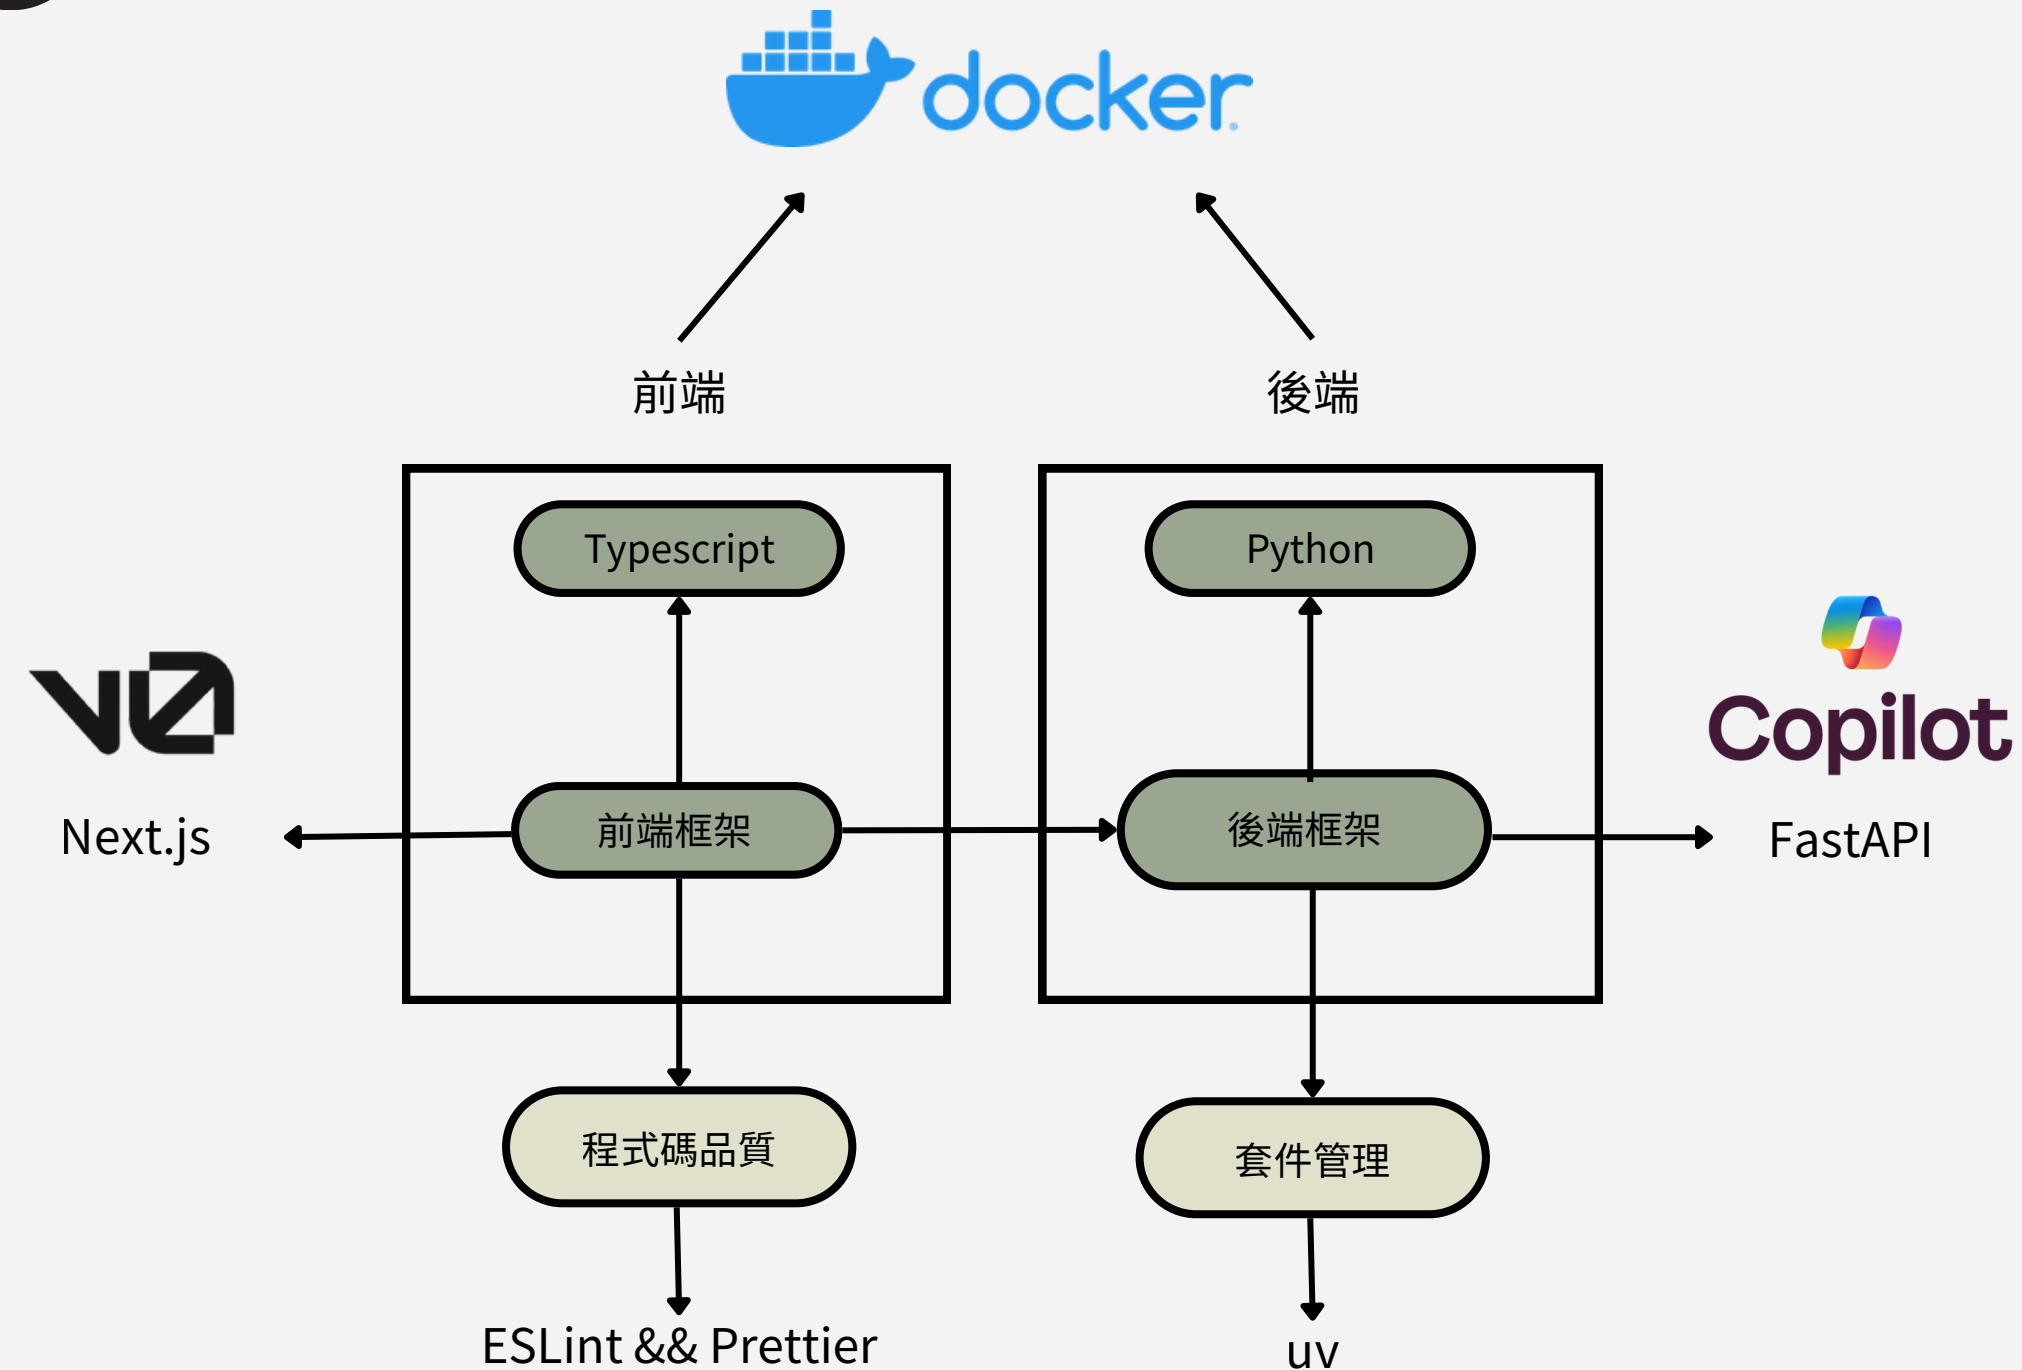

➔ Fine-tune Model

- Model : Llama-3.2-1B-Instruct
- Service
 - Colab T4 GPU
- Loss : Cross Entropy
 - → t1 用 prompt 最後 token 當 context
 - → t2 用 (prompt + t1) 當 context
 - → t3 用 (prompt + t1 + t2) 當 context
 - … 依序類推

```
lora_config = LoraConfig(  
    r=16,  
    lora_alpha=32,  
    lora_dropout=0.05,  
    bias="none",  
    task_type="CAUSAL_LM",  
    target_modules=[  
        "q_proj", "k_proj", "v_proj", "o_proj"  
    ],  
)
```

Code Review

This pull request significantly refactors and improves the agent reflection module for better clarity and maintainability. However, it introduces potential prompt injection in the agent's synthesis step and the design agent's retry flow, where LLM-generated content is integrated into subsequent prompts. Additionally, a bug has been identified in the code concatenation, and there's a typo in the pull request title that should be corrected.

YOU

Explain how different types of penalties (time penalty, drive-through, stop-and-go) are applied and how they affect final race classification.

PODCAST

A: Hey, have you ever wondered how penalties work in F1, especially during the last few laps?

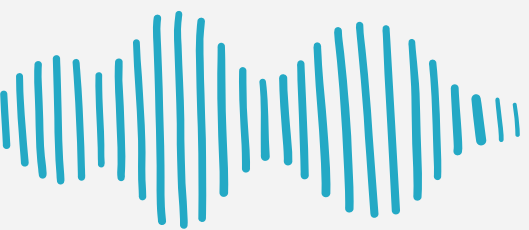

B: Yeah, I've been curious about that. I know there are different types of penalties, like time penalties and drive-through penalties. Can you explain how they affect the race?

A: Sure! So, if a driver gets a Drive-Through Penalty, they have to enter the pit lane and drive through without stopping. But here's the catch: if this penalty happens in the last three laps, they get an extra 20 seconds added to their total time after the race.

系統會根據使用者提供的資料進行檢索，再生成對應的 Podcast 對話內容。

- B1.9.5** Penalties for Incident(s) during a TTCS
- In the event of an incident during any TTCS, the stewards may impose any one of the penalties below on any driver involved in an Incident:
- A five (5) second time penalty ("**5-Second Penalty**"): The driver must enter the Pit Lane, stop in their pit stop position for at least five seconds and then re-join the TTCS.
 - A ten (10) second time penalty ("**10-Second Penalty**"): The driver must enter the Pit Lane, stop in their pit stop position for at least ten seconds and then re-join the TTCS.
 - A drive-through penalty ("**Drive-Through Penalty**"): The driver must enter the Pit Lane and re-join the TTCS without stopping.
 - A ten second stop-and-go time penalty ("**Stop-and-Go Penalty**"): The driver must enter the Pit Lane, stop in their pit stop position for at least ten seconds and then re-join the TTCS.
- iii. If either of these two (2) penalties are imposed during the last three (3) laps, the relevant driver may cross the Line on the track three times, and twenty (20) seconds will be added to the elapsed time of the driver concerned in the case of a Drive-Through Penalty or thirty (30) seconds will be added to the elapsed time of the driver concerned in the case of a Stop-and-Go Penalty.
